

The 15<sup>th</sup> edition of BioAsia 2018, the annual international lifesciences and healthcare convention scheduled to be organized at Hyderabad during February 22-24, 2018.

The convention will host an array of activities including business partnering, exhibition, technology conferences with talks from some global thought leaders, interactive sessions, CEO Conclave, startup showcase, biopark visit, networking dinners and more. In the 14<sup>th</sup> edition of the event held during Feb 2017 witnessed participation of delegates and visitors from 51 countries across the globe. Over 13000 partnering meetings have been hosted at BioAsia so far.

India's life sciences sector has come a long way upon a successful journey in the past 50 years. As the vision of this industry for the forthcoming years is now focused on expanding India's global leadership and relevance, while driving domestic access, India strives to become a major global market by 2020 in Life sciences industry. With a trend of increasing capital investment in research and development facilities, India has also become one of the leading destinations for high-end Healthcare services, thus catering to a greater proportion of population. With this context, BioAsia 2018, is all set to bring together the global industry leaders, researchers, policy makers, innovators, and investors together on one platform discussing the new opportunities and develop strategies to succeed in emerging markets like India.

Your active support and patronage will greatly help in maximizing the benefits to the Country and effectively showcasing India as the global life sciences destination in addition to strengthening and accelerating the bilateral relationship between India and Switzerland in the life sciences sector.
